Allowable Subject Matter

1. Claims 1-20 are allowed.
2. The following is an examiner's statement of reasons for allowance: The instant application is allowable over the cited prior art, because the cited prior art fails to disclose an exhaust gas purifying catalyst comprised of a composition including a first catalytic component of a composite oxide containing zirconium and manganese and/or cobalt and a second catalytic component of zeolite; wherein the zeolite is a proton zeolite or is modified with at least one element selected from the group consisting of cerium, lanthanum, phosphorus, boron, gallium, magnesium, and mixtures thereof.

Kato et al. discloses a catalyst containing Cu and/or Co supported by Zr oxide and a Cu-substituted zeolite (see abstract and p. 2, lines 38-39). However, it does not disclose or suggest either a composite oxide containing zirconium and manganese or a proton zeolite or a zeolite modified with cerium, lanthanum, phosphorus, boron, gallium, magnesium, and mixtures thereof. Tamura discloses a hydrogenated zeolite catalyst or hydrogenated zeolite catalysts with one or more metals. However, it is silent on the use of composite oxides containing zirconium and manganese.

Furthermore, the Declaration filed by Mr. Tatsuya Yoshikawa describes wherein the catalyst of the instant invention exhibits a higher nitrogen oxide conversion rate than the catalysts as taught by the instantly claimed prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
